BANDARLA JEEVAN

Java Full Stack Developer | Software Tester (Manual & Automation)

Madanapalle, Andhra Pradesh, India | +91 6309175148 | bandarlajeevan@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Final-year MCA student (2026) with hands-on industry training at Qspiders in Java Full Stack Development and Software Testing. Built and tested two end-to-end ML-integrated full-stack projects following SDLC practices, covering frontend development, backend/API integration, database design, and quality assurance. Strong foundation in Core Java, Object-Oriented Programming, Data Structures & Algorithms, and Oracle SQL, with practical exposure to Manual Testing, Selenium WebDriver, Postman API Testing, and Git/GitHub.

TECHNICAL SKILLS

Programming Languages: Java (Core), JavaScript, HTML5, CSS3, Oracle SQL

Full Stack Development: Full Stack Web Development, REST APIs, Frontend-Backend Integration

Databases: Oracle SQL (queries, joins, normalization), MongoDB

Manual Testing: Test Case Design, Test Execution, Defect/Bug Reporting, Regression Testing, Functional Testing, Black-Box Testing

Automation Testing: Selenium WebDriver; Playwright (learning)

API Testing: Postman (requests, collections, response validation), REST APIs

Concepts & Methodologies: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), SDLC, STLC, Agile Basics, Version Control

Tools: Git, GitHub, Postman, Eclipse, Visual Studio Code

EXPERIENCE

Java Full Stack Developer & Software Testing Intern — Qspiders **Feb 2026 – Present**

- Undergoing intensive, hands-on industry training in Java Full Stack Development and Software Testing, gaining end-to-end exposure to the development and QA sides of the software lifecycle.
- Built a strong foundation in Core Java (OOP, collections, exception handling) and Oracle SQL (queries, joins, normalization); strengthening DSA through applied coding exercises.
- Practicing test case design, test execution, and defect/bug logging while applying SDLC and STLC processes.
- Learning automation testing using Selenium WebDriver and Playwright to write and execute automated test scripts for web applications.
- Performing API testing with Postman, including creating requests, building collections, and validating response status codes and payloads.

PROJECTS

Context-Aware Resume Analyzer & Job Recommendation System

HTML, CSS, JavaScript, Python (ML/NLP), MongoDB

- Built a full-stack web application that analyzes uploaded resumes and recommends matching jobs with accuracy percentage scores using NLP and ML classification algorithms.
- Developed a responsive frontend using HTML5, CSS3, and JavaScript, and integrated a backend ML pipeline for real-time resume parsing.
- Designed and managed user and resume data storage in MongoDB, handling data flow between frontend, backend, and database layers.
- Performed functional testing, validating NLP/ML outputs and resume parsing results against expected behavior, and verified data consistency in MongoDB; explored Selenium to automate repetitive UI tests.

HepatoAI — Early Hepatitis Prediction Diagnostic Platform

HTML, CSS, JavaScript, Python (ML), MongoDB

- Developed a diagnostic web application for early hepatitis prediction using a hybrid FL-KNN–HDPSO–MSEM intelligent ML framework.
- Built the complete frontend and integrated the ML model with the backend to serve real-time predictions.
- Implemented secure storage of patient credentials and results in MongoDB, following data handling best practices.
- Performed functional and UI testing and used Postman to test backend APIs for patient data and predictions, validating response accuracy, error handling, and data integrity in MongoDB.

EDUCATION

Master of Computer Applications (MCA) — MITS, Madanapalle **2024 – 2026**

B.Sc. Mathematics, Electronics & Computer Science — Viswam Degree College **2021 – 2024**

CERTIFICATIONS

- Joy of Python Programming — NPTEL, IIT Kharagpur (Jan – Apr 2025)
- AI Tools & ChatGPT Workshop — Be10x (Aug 2025)

LANGUAGES

English, Telugu, Hindi
